Part 1: Disclosure of capital adequacy information (Pillar 3 Disclosures)

1. Introduction

Basel Capital Accord in accordance with Basel Framework consists of three pillars:

Pillar 1: Minimum Capital Requirement

Pillar 1 defines the minimum levels of capital that commercial banks need to provide for credit, market, and operational risks.

Pillar 2: Supervisory Review Process

Pillar 2 requires commercial banks to have sound risk management and processes for assessing overall capital adequacy to cover material risks including risks not captured under Pillar 1.

Pillar 3: Market Discipline

Pillar 3 aims to encourage market discipline as commercial banks are required to disclose information on capital adequacy and risk exposures so that market participants can assess and use such information in assessing the risk profile of the commercial banks.

To meet Pillar 3 requirements, Bank of Thailand (BOT) requires commercial banks to disclose a set of specified information relating to capital adequacy, risk management process, key information on risk exposures that reflects the risk profile of the commercial banks to the market participants in form of Pillar 3 report half-yearly and yearly as at 30 June and 31 December within 4 months from the end of each period.

2. Scope of application

This Pillar 3 disclosure report is required by BOT's notification to be disclosed at both Bank (Solo Basis) and Financial Group level (Full Consolidation Basis). For CIMB Thai Financial Group as at 30 June 2023, it consists of the following entities:

- 1. CIMB Thai Bank Public Company Limited engaged in commercial banking (the parent company)
- 2. CIMB Thai Auto Co.,Ltd. engaged in leasing/hire-purchase of automobiles
- 3. World Lease Co., Ltd. engaged in hire-purchase of motorcycles

3. Key prudential metrics

Bank of Thailand ("BOT") announced the BOT's Notification No. SorNorSor. 14/2562 Re: Capital Disclosure Requirements for Commecial Banks (Second Edition) and SorNorSor.15/2562 Re: Disclosure Requirement on Capital Adequacy for a Financial Group (Second Edition), which will come to effect for accounting periods beginning on and from 1 January 2020, requiring commercial banks to disclosure quantitative of key prudential metrics in respect of both capital and liquidity - for capital, commercial banks shall disclose information on capital that reflects the entire impact due to an increase in provisions according to TFRS 9; this framework is based on the BCBS's Pillar 3 disclosure requirements consolidated and enhanced framework (March 2017).

https://www.cimbthai.com/en/investor-relations/financial-information/pillar-three-disclosures.html

^{2/}Common Equity Tier 1 ratio available after meeting the bank's minimum capital requirements: it may not necessarily be the difference between CET 1 ratio (item 5) and the minimum CET 1 ratio requirement of 4.5% because CET 1 ratio may be used to meet the bank's minimum Tier 1 ratio requirement of 6% and/or the minimum total capital ratio requirement of 8.5%.

^{3/} To comply with BOT's notification No.SorNorSor.2/2561 dated January 25, 2018 the Bank disclosure Liquidity Coverage Raito (LCR) on the Bank's website.

LCR ratio is computed as an average ratio of month-end LCR in the quarter. This may not be equal to an LCR computed with the average values of total high-quality liquid assets (Total HQLA) and Total Net Cash Outflow.

4. Capital

4.1 Capital Structure

As at 30 June 2023, CIMB Thai Financial Group's total capital fund under Basel III was THB 58,091 million consisting of Common Equity Tier 1 (CET 1) capital of THB 43,038 million, Tier 1 capital of THB 43,038 million, and Tier 2 capital of THB 15,053 million. For Bank level, consisting of Common Equity Tier 1 capital of THB 39,722 million, Tier 1 capital of THB 39,722 million, and Tier 2 capital of THB 15,118 million and Totaling THB 54,840 million of total capital fund.

The capital components of the Bank and Financial Group comprise of:

Common Equity Tier 1 capital

- Issued and paid-up share capital
- Premium on share capital
- > Statutory reserve
- Retained earnings after appropriations
- Accumulated other comprehensive income
 - O Revaluation surplus on Land Building and Condominium Appraisal
 - O Revaluation surplus (deficit) on change in value of investments
 - O Difference from the translation of financial statements
 - O Cash flow hedge reserves
 - O Gains on financial liabilities designated at fair value relating to own credit risk
- Deducted from CET 1 capital
 - O Deferred tax assets
 - O Intangible assets
 - O Impact on revision of employee benefits based on actuarial calculation

Tier 2 capital

- General provisions mean Expected credit loss for financial assets with an insignificant increase in credit risk (performing) and for financial assets with a significant increase in credit risk (under-performing), not exceeding 1.25% of credit risk-weighted assets.
- On 29 March 2023, the Bank exercised its option to early redeem all subordinated debentures amounting to MYR 390 million (THB 3,158 million), maturing in 2028, which the Bank was able to early redeem (under the specified conditions). This early redemption was approved by BOT notification For Nor Sor1. 2/2566 Re: The approval of early redemption of subordinated debentures that counted as tier 2.

At the same time, the Bank issued MYR 415 million (THB 3,231 million) of subordinated debentures pursuant to tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital. The Bank has an approval from the Bank of Thailand to count the subordinated debenture as tier 2 capital according to the correspondence e-mail sent on 19 April 2023.

- The Bank issued MYR 550 million of subordinated debentures pursuant to Tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital. The Bank has an approval from the Bank of Thailand to count the subordinated debenture as Tier 2 capital according to the correspondence For Kor Kor. 527/2562.
- The Bank issued MYR 660 million of subordinated debentures pursuant to Tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital. The Bank has an approval from the Bank of Thailand to count the subordinated debenture as Tier 2 capital according to the correspondence For Nor Sor1. 81/2564.

2. Tier 2 capital	15,053	14,912	15,118	14,979
1. Qualifying Tier 2 capital instruments	12,462	12,388	12,462	12,388
2. General provisions*	2,591	2,524	2,656	2,591
3. Total capital funds	58,091	57,742	54,840	54,493

4.2 Capital Adequacy

Capital adequacy is critical for sound risk management and mitigation. This includes capital adequacy under both normal and stress ("extreme but plausible events") conditions. Stress test results are used for capital management and to prescribe the action plans to ensure that the Bank will meet the minimum regulatory capital requirements. For the annual capital management plan, Internal Capital Targets shall be set above the minimum regulatory capital requirements and used as early warning indicators to monitor and ensure compliance with the regulatory capital requirements.

The Bank calculates capital charges for credit risk, market risk, and operational risk in accordance with BOT's notification. The Bank obtained BOT's approval to adopt the approaches for capital calculation as follows:-

Risk Type	Approach
1. Credit Risk	Standardised Approach (SA)
2. Market Risk	Standardised Approach (SA)
3. Operational Risk	Basic Indicator Approach (BIA)

Table 3 Minimum capital requirements classified by risk types

Part 2: Liquidity coverage ratio disclosure standards

According to the Bank of Thailand releases of the BOT's Notification no. Sor.Nor.Sor. 9/2558 re: Liquidity Coverage Ratio: LCR which refers to Basel III: The Liquidity Coverage Ratio and liquidity risk monitoring tools: January 2013 by Basel Committee on Banking Supervision (BCBS). The LCR requirement aims for commercial banks to have adequate liquidity to support short-term severe liquidity stress scenarios by requiring commercial banks to maintain unencumbered High-Quality Liquid Assets (HQLA) to cover total net cash outflows over the next 30 calendar days under severe liquidity stress scenarios prescribed by the Bank of Thailand. The minimum requirement of LCR was set at 60% on 1 January 2016 and rise in equal annual steps to reach 100% on 1 January 2020, in additional to the compliance of the liquidity risk management guideline.

In 2020, the Bank of Thailand has an amendment LCR guideline according to BOT's Notification No. SorNorSor. 4/2563 Re: Liquidity Coverage Ratio: LCR (Second Edition) to comply with the credit counterparty types, assets types and financial obligations under the classification and provisioning criteria that have been improved.

According to the BCBS's LCR disclosure standards: January 2014 (revised version: March 2014), the LCR Disclosure is to improve the transparency of regulatory liquidity requirements, reinforce the sound principles, enhance market discipline besides internal control and supervision by the Bank of Thailand, and reduce uncertainty in the markets as the LCR is implemented.

Bank of Thailand ("BOT") announced the BOT's Notification No. Sor. Nor. Sor. 2/2561 re: Liquidity Coverage Ratio disclosure standards dated 25 January 2018 which requires disclose information at "Bank" level on a half-yearly and yearly basis. The first disclosure is based on data as of 30 June 2018 for the first half of 2018 results which need to be published on the Bank's website within 4 months from the end of each period.

CIMB Thai Bank Public Company Limited performs the LCR disclosure which comprises of:

- (1) Liquidity Coverage Ratio (LCR)
- (2) Total high-quality liquid assets (Total HQLA)
- (3) Total net cash outflows over the next 30 calendar days (Total net cash outflows)

1. Liquidity Coverage Ratio: LCR

Unit: THB Mil.

	2Q/2023	2Q/2022
	(average) ^{1/}	(average) ^{1/4/}
(1) Total High Quality Liquid Assets (Total HQLA)	95,375	111,460
(2) Total Net Cash Outflow within 30 Days	67,281	66,822
(Total Net Cash Outflows)		
(3) LCR (percentage) ^{2/}	142	167
BOT's LCR minimum requirement (percentage)	100	100

2. LCR figures comparison 3/

Unit: %

	2023	2022
	(average) ^{1/}	(average) 1/ 4/
1st Quarter	142	131
2nd Quarter	142	167

^{1/} Calculation based on a simple average using month-end data for each quarter. For example, Q2 were calculated by taking a simple average of month-end data in April, May and June.

^{2/} Data of item 3 (LCR) might not be equal to item 1 (Total HQLA) divided by item 2 (Total net cash outflows).

^{3/} LCR data will show Q1-Q2 for first half period and Q3-Q4 for the second half period.

^{4/} The bank has reclassified the classification of data as of 2022, therefore, the simple average during quarter 1 and 2 changed from the previous disclosure.

3. Guideline and detail information of Liquidity Coverage Ratio

The bank maintains LCR according to Bank of Thailand's standard to ensure that the bank has sufficient HQLA to survive a significant stress scenario lasting for 30 days. The bank set LCR at 60% on 1 January 2016 and rise in equal annual steps to reach 100% on 1 January 2020.

Average LCR of the 2nd Quarter 2023 was 142% which was higher than the minimum requirement of Bank of Thailand at 100%. The compositions of LCR are:

1. **High-quality liquid assets (HQLA)** refer to the good quality assets which are high liquid, low risk, unencumbered and can be easily and immediately converted into cash at little or no significant loss of value under stress scenario. However, each of HQLA has hair cut rate to adjust and cap the limit of holding based on Bank of Thailand.

Average HQLA of the 2nd quarter of 2023 was THB 95,375 million (91% was HQLA level 1 including cash and balance at BOT and Government Bond). The computation was to average the balances of HQLA during April to June 2023.

2. **Net Cash Outflow (Net COF)** means the total expected cash outflows minus total expected cash inflows in the specified stress scenario for the subsequent 30 calendar days. Total expected cash inflows are expected to flow in under the scenario up to an aggregated cap of 75% of total expected cash outflows.

Total net cash outflows	=	Expected cash outflows	_	Expected cash inflows
over the next 30 days		over the next 30 days		over the next 30 days
under severe liquidity		under severe liquidity		under severe liquidity
stress scenarios		scenarios		scenarios

Average expected net cash outflows of the 2nd quarter 2023 was THB 67,281 million which was to average the balances of net cash outflows for subsequent 30 calendar days during April to June 2023. Total expected cash outflows are mostly from deposit withdrawal and borrowing which calculated by the run-off rate as BOT's definitions while total expected cash inflows are majored from

performing loan repayment and maturing in deposit placement and debt intrument which calculated by the inflow rates as BOT's definitions as well.

Moreover, the bank assesses and anlyses the liquidity gap and funding concentration on regularly basis. This is to ensure that is the bank has sufficient liquidity for business operation and also continuously develops the analytical measurements to align with the international standards and the business strategies as well.
