## Part 1: Disclosure of capital adequacy information (Pillar 3 Disclosures)

### 1. Introduction

Basel Capital Accord in accordance with Basel Framework consists of three pillars:

#### ■ Pillar 1: Minimum Capital Requirement

Pillar 1 defines the minimum levels of capital that commercial banks need to provide for credit, market, and operational risks.

#### ■ Pillar 2: Supervisory Review Process

Pillar 2 requires commercial banks to have sound risk management and processes for assessing overall capital adequacy to cover material risks including risks not captured under Pillar 1.

#### ■ Pillar 3: Market Discipline

Pillar 3 aims to encourage market discipline as commercial banks are required to disclose information on capital adequacy and risk exposures so that market participants can assess and use such information in assessing the risk profile of the commercial banks.

To meet Pillar 3 requirements, Bank of Thailand (BOT) requires commercial banks to disclose a set of specified information relating to capital adequacy, risk management process, key information on risk exposures that reflects the risk profile of the commercial banks to the market participants in form of Pillar 3 report half-yearly and yearly as at 30 June and 31 December within 4 months from the end of each period.

### 2. Scope of application

This Pillar 3 disclosure report is required by BOT's notification to be disclosed at both Bank (Solo Basis) and Financial Group level (Full Consolidation Basis). For CIMB Thai Financial Group, it consists of the following entities:

1. CIMB Thai Bank Public Company Limited engaged in commercial banking (the parent company)
2. CIMB Thai Auto Co.,Ltd. engaged in leasing/hire-purchase of automobiles
3. World Lease Co.,Ltd. engaged in hire-purchase of motorcycles
4. CT Coll Co.,Ltd. engaged in debt collection service

### 3. Key prudential metrics

Bank of Thailand (“BOT”) announced the BOT’s Notification No. SorNorSor. 14/2562 Re: Capital Disclosure Requirements for Commercial Banks (Second Edition) and SorNorSor. 15/2562 Re: Disclosure Requirement on Capital Adequacy for a Financial Group (Second Edition), which will come to effect for accounting periods beginning on and from 1 January 2020, requiring commercial banks to disclosure quantitative of key prudential metrics in respect of both capital and liquidity - for capital, commercial banks shall disclose information on capital that reflects the entire impact due to an increase in provisions according to TFRS 9; this framework is based on the BCBS’s Pillar 3 disclosure requirements consolidated and enhanced framework (March 2017).

## 4. Capital

### 4.1 Capital Structure

As at 30 June 2020, CIMB Thai Financial Group's total capital fund under Basel III was THB 51,227 million consisting of Common Equity Tier 1 (CET 1) capital of THB 36,375 million, Tier 1 capital of THB 36,375 million, and Tier 2 capital of THB 14,852 million. For Bank level, consisting of Common Equity Tier 1 capital of THB 33,379 million, Tier 1 capital of THB 33,379 million, and Tier 2 capital of THB 14,944 million and Totaling THB 48,323 million of total capital fund.

The capital components of the Bank and Financial Group comprise of:

#### Common Equity Tier 1 capital

- Issued and paid-up share capital
- Premium on share capital
- Statutory reserve
- Retained earnings after appropriations
- Accumulated other comprehensive income
  - Revaluation surplus on Land Building and Condominium Appraisal
  - Revaluation surplus (deficit) on change in value of investments
  - Difference from the translation of financial statements
  - Cash flow hedge reserves
  - Gains on financial liabilities designated at fair value relating to own credit risk
- Deducted from CET 1 capital
  - Deferred tax assets
  - Intangible assets
  - Impact on revision of employee benefits based on actuarial calculation

#### Tier 2 capital

- General provisions mean Expected credit loss for financial assets with an insignificant increase in credit risk (performing) and for financial assets with a significant increase in credit risk (under-performing), not exceeding 1.25% of credit risk-weighted assets.
- The Bank issued MYR 570 million of subordinated debentures pursuant to Tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital.

The Bank has an approval from the Bank of Thailand to count the subordinated debenture as Tier 2 capital according to the correspondence For Kor Kor. (02) 414/2559.

- The Bank issued MYR 390 million of subordinated debentures pursuant to Tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital. The Bank has an approval from the Bank of Thailand to count the subordinated debenture as Tier 2 capital according to the correspondence For Kor Kor. 221/2561.
- The Bank issued MYR 550 million of subordinated debentures pursuant to Tier 2 subordinated debenture programme to overseas investors. The debenture has qualifying capital instruments under Basel III, which could be fully counted as capital. The Bank has an approval from the Bank of Thailand to count the subordinated debenture as Tier 2 capital according to the correspondence For Kor Kor. 527/2562.

\* As at 31 Dec 2019, the classification and provision of reserves according to the BOT's Notification No. SorNorSor. 5/2559 dated June 10, 2016.

#### 4.2 Capital Adequacy

Capital adequacy is critical for sound risk management and mitigation. This includes capital adequacy under both normal and stress (“extreme but plausible events”) conditions. Stress test results are used for capital management and to prescribe the action plans to ensure that the Bank will meet the minimum regulatory capital requirements. For the annual capital management plan, Internal Capital Targets shall be set above the minimum regulatory capital requirements and used as early warning indicators to monitor and ensure compliance with the regulatory capital requirements.

The Bank calculates capital charges for credit risk, market risk, and operational risk in accordance with BOT’s notification. The Bank obtained BOT’s approval to adopt the approaches for capital calculation as follows:-

Risk Type	Approach
1. Credit Risk	Standardised Approach (SA)
2. Market Risk	Standardised Approach (SA)
3. Operational Risk	Basic Indicator Approach (BIA)

**Table 3 Minimum capital requirements classified by risk types**

## Part 2: Liquidity coverage ratio disclosure standards

According to the Bank of Thailand release of the BOT's Notification No. SorNorSor. 9/2558 re: Liquidity Coverage Ratio: LCR, which refers to Basel III: The Liquidity Coverage Ratio and liquidity risk monitoring tools: January 2013 by Basel Committee on Banking Supervision (BCBS). The LCR requirement aims for commercial banks to have adequate liquidity to support short-term severe liquidity stress scenarios by requiring commercial banks to maintain unencumbered High-Quality Liquid Assets (HQLA) to cover total net cash outflows over the next 30 calendar days under severe liquidity stress scenarios prescribed by the Bank of Thailand. The minimum requirement of LCR was set at 60% on 1 January 2016 and rise in equal annual steps to reach 100% on 1 January 2020, in addition to the compliance of the liquidity risk management guideline.

In 2020, the Bank of Thailand has an amendment LCR guideline according to BOT's Notification No. SorNorSor. 4/2563 Re: Liquidity Coverage Ratio: LCR (Second Edition) to comply with the credit counterparty types, assets types and financial obligations under the classification and provisioning criteria that have been improved.

According to the BCBS's LCR disclosure standards: January 2014 (revised version: March 2014), the LCR Disclosure is to improve the transparency of regulatory liquidity requirements, reinforce the sound principles, enhance market discipline besides internal control and supervision by Bank of Thailand, and reduce uncertainty in the markets as the LCR is implemented

Bank of Thailand ("BOT") announced the BOT's Notification No. SorNorSor. 2/2561 re: Liquidity Coverage Ratio disclosure standards dated 25 January 2018 which requires to disclose information at "Bank" level on a half-yearly and yearly basis. The first disclosure is based on data as of 30 June 2018 for the first half of 2018 results, which need to be published on the Bank's website within 4 months from the end of each period.

CIMB Thai Bank Public Company Limited performs the LCR disclosure, which comprises of:

- (1) Liquidity Coverage Ratio (LCR)
- (2) Total high-quality liquid assets (Total HQLA)
- (3) Total net cash outflows over the next 30 calendar days (Total net cash outflows)

### 1. Liquidity Coverage Ratio: LCR

Unit: Million Baht

	2Q/2020 <sup>*</sup> (average)	2Q/2019 <sup>*</sup> (average)
(1) Total High Quality Liquid Assets (Total HQLA)	78,823	49,327
(2) Total Net Cash Outflow within 30 Days (Total net cash outflows)	52,900	41,095
(3) LCR (%)	150	120
BOT's LCR minimum requirement (%)	100	90

<sup>\*</sup> computation by simple average based on average data of each quarter

### 2. LCR figures comparison

Unit:%

	2020 <sup>*</sup> (average)	2019 <sup>*</sup> (average)
1 <sup>st</sup> Quarter	153	137
2 <sup>nd</sup> Quarter	150	120

<sup>\*</sup> computation by simple average based on average data of each quarter

### 3. Guideline and detail information of Liquidity Coverage Ratio

The bank maintains LCR according to Bank of Thailand's standard to ensure that the bank has sufficient HQLA to survive a significant stress scenario lasting for 30 days. The bank set LCR at 60% on 1 January 2016 and rise in equal annual steps to reach 100% on 1 January 2020

$$\text{LCR} = \frac{\text{Stock of High-Quality Liquid Assets (HQLA)}}{\text{Total Net cash outflows over the next 30 calendar days}}$$

Average LCR of the 2<sup>nd</sup> Quarter 2020 was 150% which was higher than the minimum requirement of Bank of Thailand at 100%. The computation was from average LCR at month-end of April 2020 at 150.8%, May 2020 at 141.0% and June 2020 at 157.1%. The compositions of LCR are:

**1. High-quality liquid assets (HQLA)** refer to the good quality assets which are high liquid, low risk, unencumber and can be easily and immediately converted into cash at little or no significant loss of value under stress scenario. However, each of HQLA has hair cut rate to adjust and cap the limit of holding based on Bank of Thailand.

Average HQLA of the 2<sup>nd</sup> quarter of 2020 was THB 78,823 million (93% was HQLA level 1 including cash and balance at BOT and Government Bond). The computation was to average the balances of HQLA during April to June 2020.

**2. Net Cash Outflow (Net COF)** means the total expected cash outflows minus total expected cash inflows in the specified stress scenario for the subsequent 30 calendar days. Total expected cash inflows are expected to flow in under the scenario up to an aggregated cap of 75% of total expected cash outflows.

Total net cash outflows over the next 30 calendar days	=	Total expected cash outflows	-	Min {total expected cash inflows; 75% of total expected cash outflows}
--	---	------------------------------	---	--

Average expected net cash outflows of the 2<sup>nd</sup> quarter 2020 was THB 52,900 million which was to average the balances of net cash outflows for subsequent 30 calendar days during April to June 2020. Total expected cash outflows are mostly from deposit withdrawal and borrowing which calculated by the run-off rate as BOT's definitions while total expected cash inflows are majored from performing loan repayment and maturing in deposit placement and debt instrument which calculated by the inflow rates as BOT's definitions as well.

Moreover, the bank assesses and analyses the liquidity gap and funding concentration on regularly basis. This is to ensure that is the bank has sufficient liquidity for business operation and also continuously develops the analytical measurement to align with the international standards and the business strategies as well.
